

"You've got this package down to an art form—well done!"

8' hexagon gazebo with optional cupola built by John Boyd of High River, Alberta

Why choose western red cedar?

It's Beautiful

Western red cedar's rich grain and vibrant color make it the preferred material for all applications where beauty is important.

It's Strong

Western red cedar has excellent dimensional stability and endurance. It lays flat; stays straight; and is less likely to twist and crack than other wood products, including treated lumber.

It's Long Lasting

The supremacy of western red cedar as an all-weather building material is entirely natural. Western red cedar is beautiful, stable, and enduring. It contains natural oils that act as preservatives to help the wood resist insects and decay. Properly finished and maintained, western red cedar ages gracefully and lasts for many years.

It's Nontoxic

Western red cedar is nontoxic, making it safe for all uses. It requires no chemical treatment unless the wood is in direct contact with the ground, in which case a protective sealant will protect it against moisture.

It's Aromatic

Western red cedar is probably best known for its distinctive aroma. Over time, the wood remains subtly aromatic, and the characteristic fragrance adds another dimension to the universal appeal of Cedarshed's products.

Cover image story

"Thank you for exceeding our expectations."

My wife and I did a lot of research and looked at many Gazebos before we chose Cedarshed. You exceeded our expectations in the following ways:

- Assembly instructions and video so well done that, at 72 years of age, I built the gazebo myself except for 15 minutes' help from my wife to place the first two rafters.*
- Screen kit design is so tight we have no bugs from our mosquito infested woods.*
- Excellent packaging and shipping—shipped halfway across the country LTL with no damage.*
- Your quality and price, we feel, are superior to your competitors' gazebos.*

12' octagon gazebo with optional two-tier roof and cupola featured on cover built by Burt and JoAnn Johnson of North Oaks, Minnesota
