

Cedarshed garden sheds

Imagine a charming backyard garden retreat, the perfect poolside cabana, an attractive playhouse for all ages, or simply an eye-catching storage solution. No matter their use, our garden sheds blend in with your surroundings.

Cedarshed Garden Sheds are strong, durable, and attractive and are available in many different styles and sizes.

“Putting this garden shed together was a piece of cake. I’m looking at another in a short time.”

9' x 6' cabana

9' x 6' cabana on left built by H. Leo and Joelyn Higgins of Seattle, Washington

Interior of 12' x 12' sunhouse

Can you assemble one of our garden sheds?

Our garden sheds are easy to assemble and require **no cutting**. All our sheds are shipped in knockdown panels that are ready to be fastened together. They are designed and constructed so people with limited building and carpentry skills can complete the project themselves.

What's included in each Kit?

You will receive a complete, ready to assemble kit that will include cedar floor panels, wall panels, and roof panels with cedar shingles already attached. Also included is the hardware necessary to assemble the garden shed.

Our sheds are made entirely with western red cedar. All framing components are 2"x 3" and all wall cladding is bevel siding. Cedar shingles are used for the roof and Plexiglass is used in all our windows.

How much time should it take?

You should be able to comfortably complete one of our sheds during the weekend. This would include preparing and leveling your foundation. You may be surprised to find that you spend more time preparing and leveling your foundation than actually assembling your garden shed.

As easy as 1-2-3!
