

- ◆ **Quality, All-Steel and vinyl clad/steel framed storage sheds**
- ◆ **Totally Maintenance-Free**
- ◆ **IMPORTANT Technical & Package Details**
- ◆ **PLEASE READ BEFORE DELIVERY OF YOUR ORDER**

- ◆ Please read your order acknowledgement and **advise us of any additional accessories you may require.**
- ◆ **Optional steel foundation kit - for all-steel sheds only:** If you have no base, OR an uneven/oversized existing concrete or flagstone base. **NOTE: the steel foundation kit IS ALREADY INCLUDED WITH ALL VINYL CLAD SHEDS!**
- ◆ **Optional HILTI Hammascrows & Masonry Drill Bit-for all-steel sheds only:** for securing the shed to an existing or purpose made, level concrete or slab base.
- ◆ **Optional Installation of your shed**—through our independently operating installation expert.
- ◆ Please check that **ALL of your personal details are correct**, particularly your Post Code and Daytime Tel. No.
- ◆ Your shed, and optional accessories (if ordered), will be delivered by our specialist delivery team of drivers—or in exceptional circumstances by a carefully selected carrier.

- ◆ **Most Important:** Kindly study the comprehensive details provided below for each TUIN shed model and satisfy yourself that the shed you have ordered meets with your space requirements!
- ◆ **All TUIN sheds are flat packed for uncomplicated home assembly.**
- ◆ **Accordingly, the product ordered will arrive in ONE (or more) carton/s.**

#### **Useful Do's and Don'ts**

- ◆ **Upon Delivery:** Please check each carton for any external damage to the packaging. If there is any damage, state 'damaged' on the driver's receipt note and inform us directly on 01508 481 622.
- ◆ **Do NOT** handle the heavy shed carton on your own. Please ensure that any carton is NOT dropped on any corner or long side—this will damage the shed parts inside the carton.
- ◆ **Store all cartons comprising your order in a dry place** (and off the floor) as dampness will make it very difficult to handle the larger carton/s when you are ready to assemble the product in your garden.
- ◆ Until your base is ready, do **NOT** attempt to assemble your shed.

#### **Before You Start assembling your shed**

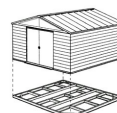

- ◆ **Please read the Owner's Manual in each carton and familiarize yourself with EACH part.**
- ◆ **Check that ALL parts are present, if NOT, please telephone us on 01508 489 260 so that we can get any damaged or missing part/s to you by return.**
- ◆ **You will need the occasional assistance of another person—at least to the stage of the roof construction.**
- ◆ **DO NOT attempt assembling the shed in WINDY conditions. The product is NOT stable until fully secured to its intended base.**

#### **Base Alternatives**

- ◆ A new, level concrete or flagstone base (constructed to the 'Required Base Size' in the chart below) is the most desirable solution. When construction the base, please insert a strong polythene sheet BELOW the concrete or flagstones to prevent rising damp.
- ◆ Existing concrete or flagstone bases are rarely level, or correctly sized for the shed to be installed—and often DO NOT have a damp proof membrane. **If that is the case, consider our optional steel foundation kit available for each all-steel shed in the TUIN range. Note: A foundation kit is ALREADY INCLUDED WITH EVERY TUIN VINYL CLAD SHED.**
- ◆ After completed assembly of both foundation kit and shed, the entire foundation kit inside the shed can be flooded out with concrete for a smooth, permanent surface. Alternatively, obtain correctly sized timber sections to cover the foundation kit inside the shed.
