

Why choose a carport?

A carport is considerably less expensive than a garage. In addition, you get more room in your home - room you would probably rather use as an office or hobby room, or even to extend your living room. And a carport can also serve as a deck awning in your garden.

Our carports offer your car and yourself the same protection. The constant air circulation means no corrosion. In freezing weather, there's no chance of ice forming on your tyres.

Gardival® garden screens can be fully integrated into the carport, providing additional protection for your vehicle from wind and rain.

Carports from Gardival® are modular constructions and can as a result be modified to accommodate a second or third vehicle.

All carports from Gardival® are pressure-treated and have square 12 x 12 x 300 cm posts without stirrups.

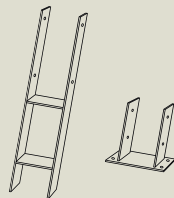

The distance between posts is designed for the insertion of Gardival® wind screens. The free height is ± 195 cm, and the 12 cm Ø guttering and drain pipe are in PVC.

Carport storages

All storages are pressure-treated. They have a wall thickness of 28 mm. They do not have a wooden floor.

All storages have a fixed window, with original cross bars in the side wall and decorative shutters, a 80 x 188 cm door which opens inwards to the left or outwards to the right.

Post holder and footing available as options.

The window size varies as a function of the length of the side wall.

60 x 95 cm	2 m storage side wall
81 x 95 cm	2.5 m storage side wall
101 x 95 cm	3 or 4 m storage side wall

Doors and/or windows are finished with black metal work.

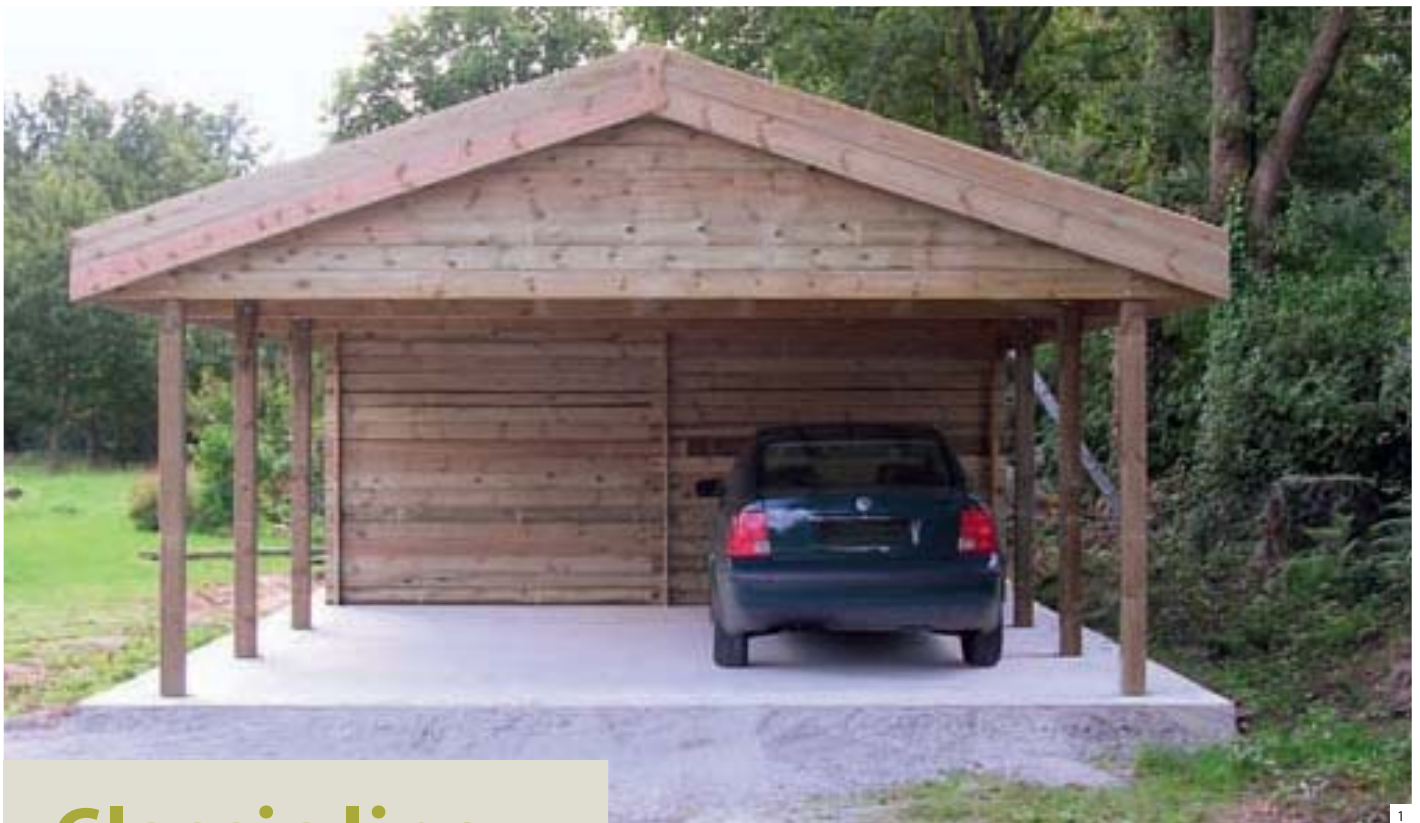

The dimensions are the overall size of the roof. They can change depending on the roof cladding.

The Firenze line is an exception to the general description (see pages 42 - 43).

The carport line options are listed on the back flap.

This section contains an overview of possible treatments per model. They can also be made to measure.

Please also refer to the **Quick-Pro range, where you'll find for a number of carports in a standard design** and available ex-stock (see pages 52 - 53).

Classic line

*Free-standing carport
with apex roof*

All Classic line carports have apex roofs with a pitch of 18°. This carport has a straight fascia board all round.

Classic carport with storage

Classic carports are also available with storage. The general specifications on page 36 apply to the storages.

Roof cladding

Felt shingles
Steel tiles

The carport Classic line options are listed on the back flap.

Firenze line

*Free-standing carport
with bowed roof*

All Firenze line carports have bowed roofs and a front and rear bowed fascia. At the side, the Firenze carport has a plain finish, 2 boards high.

Firenze carport with storage

Firenze carports are also available with storages (28 mm).

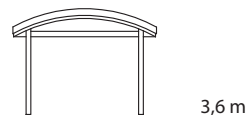

The 2-panel wood doors open outwards to the right. The fixed window without shutters or cross bars measures 121 x 56 cm. Door and windows are located in the side wall and have modern fittings. There is no wooden floor.

The general specifications on page 36 apply to the storages.

Mono line

Carport extension with pitched roof

The pitch of all Mono line carport roofs is 18°. This carport has a straight fascia board on three sides.

The dimensions of the carport determine the number of wall anchors.

Mono carport with storage

Mono carports are also available with storages. The storage has three walls, two of which are fastened to the existing wall by a piece of U-shaped timber.

In the case of the Mono carport and Mono carport with storage, there is no sealing between the existing wall and the extension.

Roof cladding

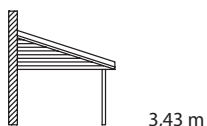

Felt shingles
Steel tiles

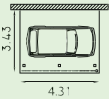

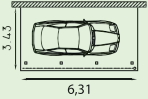

The carport Mono line options are listed on the back flap.

Modern line

Carport extension with flat roof

All Modern line carports have a slightly pitched roof which is hidden by plain fascia boards on three sides. This gives the impression of a flat roof. The dimensions of the carport determine the number of wall anchors.

Modern carport with storage

Modern carports are also available with storages. The storage has three walls, two of which are fixed to the existing wall by a U-shaped piece of timber.

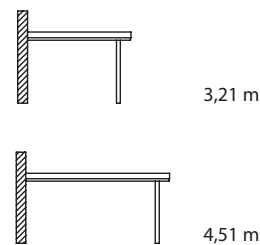

In the case of the Modern carport and Modern carport with storage, there is no sealing between the existing wall and the extension.

The general specifications on page 36 apply to the storages.

Roof cladding

Steel sheets
Polycarbonate

The carport Modern line options are listed on the back flap.
