A pyramid roof with wider overhang

What could be more pleasant than a relaxing day in your own garden. From a scorching summer day to a white winter morning, your garden always offers something special.

WHY?

BECAUSE IT'S YOUR GARDEN, based on your own ideas, created and cared for by your own hands. Your tailor-made garden.

With Gardival® at your side. Whether it's a garden building, garage, carport, gazebo or leisure building, you're sure to find a model to suit your needs from our extensive range. The variety of options allows you to add that personal touch.

Take a look, discover the charm, and select your very own Gardival® from our latest catalogue. If you have any further questions, our staff will be only too pleased to assist and advise you. However, you'll find the answers to most questions at the back of this brochure.

Gardival® combines the quality of wood with the latest technology, years of experience, constant product development and creativity. All combined to offer you a service beyond compare. Gardival® creates UNIQUE products - exactly what your garden needs.

Good luck with your choice. Enjoy your Gardival® creation.

Your Gardival®-team.

The warm, tranquil peace
of a colourful garden
basking in the sun
caressed by wind and dew
counting white clouds like sheep
in the blue sky
the soothing warmth
of the sun
and the kiss of the wind

Note: painted by owner

Gardival®

Inspirational timber designs

Wood

Respect and gratitude for that generous provider: nature. She gives us the wood needed to produce the ideal Gardival® creation.

Our specialists select only the most suitable growth areas, where slow-growing, northern varieties of pine are found. These properties guarantee outstanding strength and stability in the wood.

Wood is and remains a living material. That makes it an interesting and fascinating material to work. Changes in the weather conditions cause it to shrink and expand. The cracks and splits which occur so spontaneously, but which do not affect the quality of the wood, give Gardival® products their natural charm.

Quality

Pressure treatment

Our years of experience with this process guarantee years of enjoyment from your Gardival® product.

If the greenish colour of the wood turns to grey over time (this does not reduce the quality), it can be touched up or stained.

If you opt for a non-treated finish, your local specialist can advise on the correct treatment to protect the wood.

Doors and windows

All doors and windows are enclosed in a tailor-made and easily installed frame (except the Vintage line).

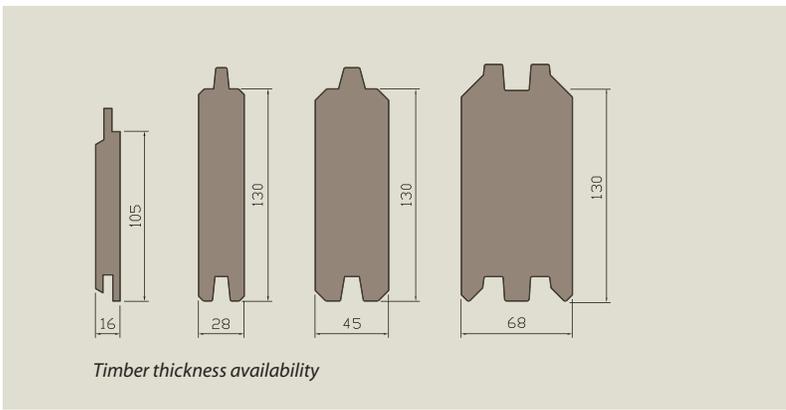

Windows for the Classic, Modern, Mono and Versailles lines, as well as carports, have single glazing, with original cross bars to divide the window into smaller panels.

The Firenze line also use single glazing but without cross bars.

The exterior joinery in the Prestige line uses tropical hardwood and double-glazing.

The interior doors in the Prestige weekend line are finished on both sides in Nordic pine boards.

Most doors have decorative black fittings. The choice of windows and doors offers a wide range of personalisation options for your log cabin.

Creativity

Floors

All Gardival® floors are pressure-treated. Wooden floors (16 mm boards) are

constructed in several sections and are easy to install.

If tradition, expert knowledge, technology, enthusiasm and passion are combined, the result will be well-finished garden buildings, garages, carports, leisure buildings, etc.

ses, new components, new technologies, new applications and the like.

The Gardival® team is constantly looking for new models, new production processes,

A healthy exchange of ideas between the market and our production and R&D teams feeds our suggestion box constantly. Even now, we are working on the garden of the future.

Flexibility

A unique garden building or garage, tailor-made to your requirements, is a natural reflection of your good taste.

Different wall thicknesses, different roof finishes, different windows and doors, front and/or rear decks, overhangs, etc.

Starting from our wide range of standard models accompanied by numerous options, we can construct the exact design to meet your requirements.

Flexibility is a byword at Gardival®. If we can build it, we can make any dream a reality. And our team of creative and skilled people can help with your dreams.

Service

A group of highly motivated employees will take care of your orders.

want it, our production and logistics staff will set to work to ensure your Gardival® dream appears in your garden as quickly as possible.

Using our specially developed order form and after receiving your signed agreement that everything is as you
