

PARAFFIN

SUPER-WARM 7
Model 688

This model utilises a very special burner with a round wick, which burns with a blue-flame giving a very effective output. This heater is ideal for a greenhouse up to 7sq.ms (8'x8').

Capacity: 4.5ltr
Continuous burning time on one filling: up to 3 days

PARAFFIN

LARGE COLD-FRAME HEATER
Model 586

This heater is suitable for a sectioned area of a greenhouse or the larger cold-frame, making it ideal for the Parasene range of Cold-frames and Gro-Houses.

Capacity: 2.25ltr
Continuous burning time on one filling: up to 14 days

PARAFFIN

SUPER-WARM 4
Model 681

Europe's favourite heater up-graded. Ideal for use in a small greenhouse of up to 4sq.ms (6'x6'), or as an anti-frost heater in a larger structure.

Capacity: 4.5ltr
Continuous burning time on one filling: up to 7 days

PARAFFIN

SUPER-WARM 5
Model 682

Ideal for use in a greenhouse of up to 5sq.ms (6'x8'), or as an anti-frost heater in a larger structure.

Capacity: 4.5ltr
Continuous burning time on one filling: up to 3.5 days

Accessories

MODEL NO.	DESCRIPTION
530	Spare Wicks (681/682) 4 per card
531	Spare Wicks (586) 2 per card
532	Spare Wicks (499/560) 2 per card
534	Spare Wicks (688/689) 1 per card
536	Spare Wicks (591) 1 per card
537	Spare Wicks (692) 1 per card
600	4 Litre super-warm fuel container
605	Parafresh paraffin deodoriser

PARAFFIN

COLD-FRAME HEATER
Model 560

Ideal for heating a small sectioned area of a greenhouse or to assist propagation in a cold-frame.

Capacity: 0.5ltr
Continuous burning time on one filling: up to 3 days

PARAFFIN

WARM-LITE
Model 499

This is ideal for emergency lighting and barbecues, although it can be used for localised heat in a cold-frame or a small sectioned area in a greenhouse.

Capacity: 0.5ltr
Continuous burning time on one filling: up to 3 days

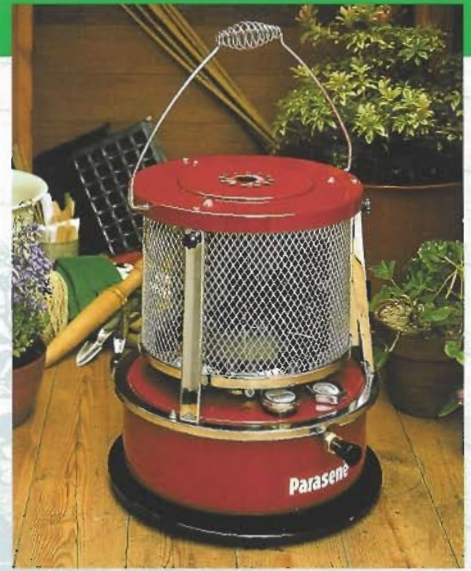

PARAFFIN

**SUPER-WARM 10
Model 692**

This heater is the sister to model 591A, the Big Red Heater, and is ideal for a greenhouse up to 10sq.ms (8'x12').

Capacity: 2.5ltr
Continuous burning time on one filling: up to 19 hours

PARAFFIN

**THE BIG RED HEATER
Model 591A**

This is a very powerful greenhouse heater, minimum greenhouse size is 8'x10', maximum 14sq.ms (8'x14') and burns with a blue flame.

Capacity: 4.0ltr
Continuous burning time on one filling: up to 16 hours

ELECTRIC

**FROST-SHIELD 2KW
Model 597**

Thermostatically controlled heaters. Their features include that they are drip proof, making them ideal for the greenhouse, they come complete with a wall bracket, and they incorporate the frost-stat, and can also be used as a fan. The heaters can be used on full or half power.

Heat output: 1kW & 2kW

FROST-SHIELD 3KW Model 599

Includes all the features of the smaller model 597, with obviously a higher heat output, making it suitable for larger structures.

Heat output: 3kW (may also be used on half power)

ELECTRIC

**FROST-GUARD
Model 594**

A Modern 2kW heater which may be used in either a greenhouse or conservatory. Full thermostatic control provides the right environment for seeding and propagation.

ELECTRIC

**FROST-FIGHTER
Model 593**

A 2kW heater with full thermostatic control which may be used in either a greenhouse or conservatory to circulate air for those hot summer days.
